

## Seattle Aerial Lift Train the Trainer

Seattle Aerial Lift Train the Trainer - The train the trainer program for aerial lifts helps to teach the trainers how to safely train prospective operators in an industrial surroundings. Trainers would be provided with in-depth instruction on the workings of aerial lift equipment. The program is provided on an open enrollment basis and delivered at selected training sites. Prior to certification, trainers are assessed and scored based on their demonstrated skills and understanding.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the best training provider within the industry, we offer top notch hands-on training. We offer lots of opportunities to practice the techniques and concepts that are learned within the classroom. In addition to hands-on experience, trainers develop general knowledge of machine theory and instructional methods, classroom and field communication skills, and ability to effectively train and assess operators. Trainers would gain knowledge about what traits make an effective trainer.

The Aerial Lifts Train the Trainer Program likewise teaches the right methods required in order to express the correct information in the classroom and field environment. There are three factors of machinery operation that the trainer should learn how to convey to operators: what to do; how to do it; and the reason why it should be carried out.

In the program, trainers will be provided with the latest, detailed reference material to better help them convey the information to machine operators. The manuals utilized, include detailed information on all aspects of industrial mobile machine operator training. Incorporated in the package are training aids which provide a visual reference in order to enhance the learning experience. The equipment-specific training products contain essential materials meant for both the operator and the trainer: videos/DVD's, overhead transparencies, equipment models, safety message posters; stability pyramids and digital training aids.
