

## Seattle Forklift Safety Training

Seattle Forklift Safety Training - Any individual who would like to operate a lift truck should take a forklift safety training program to become a certified forklift truck operator. There are different ways to obtain forklift training. Programs are offered through company forklift certification programs, workforce training agencies, and approved video and on line programs. The cost could be minimal (or free) when provided by occupational safety officers on job sites or through employment agencies.

In nearly all nations, forklift operators are needed to be over the age of 18 years old. Local industry bodies along with local and federal authorities could approve the forklift safety training courses. They require that operators acquire forklift certification before operating a forklift machinery. A certificate is valid for four years in most areas. Companies that hire workers to drive lift truck trucks could face serious liability issues if operators fail to keep this certificate up to date.

The untrained forklift operator is more at risk to cause injuries or damages because of incorrect use of the forklift. Thus, safety training courses would include proper methods for driving and loading. Workers must pass a written test in order to be certified. A company will usually assign a supervisor to provide hands-on training to new workers. A qualified supervisor should have extensive training in forklift safety and be certified as a trainer.

Those seeking work as forklift operators have options for acquiring forklift safety training and certification. Forklift training might be available through an employment agency or a workforce development agency. Those looking for employment as forklift operators can enroll in forklift safety training programs provided by an approved trainer at an independent site. Manual laborers could find more job opportunities if they have lift truck certification.

The internet provides another alternative for those seeking forklift safety training. Training is offered via online and video formats. Then again, certification usually requires that students write a test and take a forklift driving test.
