

Seattle Counterbalance Forklift License

Seattle Counterbalance Forklift License - Forklifts, when operated by totally trained personnel, are a major advantage to companies. We provide a thorough training program consisting of all aspects of operating a powered lift machinery. Counterbalance forklift training offers operators of forklifts with the knowledge and practical skills considered necessary so as to efficiently and safely operate forklifts. The program offers a combination of classroom theory, participant observation and hands-on training in a warehouse-type environment. Training could be customized and/or on site.

The course covers the fundamentals of powered lift trucks, like for instance regulations and rules, parts, load centres and factors affecting stability. General operating procedures are taught, like for example circle check, startup, shutdown, forward/reverse on level ground, and operating around other people. Load handling subject matters include load pickup and placement, selection of loads, load security and integrity, loading and off-loading trailers. Individuals participating would learn operational maintenance procedures, like for instance refueling and recharging. Safety issues in the workplace will be discussed. Participants would know the environmental conditions affecting the performance of the lift truck and be able to recognize possible dangers. Advanced training on propane handling could be incorporated.

Both employees and employers could deal with severe penalties if national and industry rules are not followed in the operation of forklifts. Workers who operate a reach truck or forklift should be knowledgeable regarding the rules concerning their safe operation. Training is suggested for anybody applying for work which requires forklift operation.

We provide in-class theory and hands-on training inside personalized, small classes. Training choices comprise entry level or refresher courses.
